

# WASHINGTON ARCHITECTURAL FOUNDATION COMMUNITY DESIGN SERVICES

## Volunteer Application

**Community Design Services** delivers conceptual design services to area-wide community and non-profit organizations. CDS coordinates architecture, landscape, planning, interiors, graphic, engineering and other design professionals to provide these services on a volunteer pro-bono basis.

Starting with a request from a qualified non-profit client, CDS puts together a team of professionals and coordinates the relationship through client meetings, design review, and document presentation. The client then uses the conceptual documents for a variety of purposes, which may include seeking funding for project development and construction costs, or obtaining further professional design services. CDS is the catalyst for projects that might not otherwise get started, allowing local non-profits to focus their funds on programmatic needs instead of initial design concepts.

The information you provide below will go into our volunteer database. As we receive requests for professional services, we may contact you regarding your interest in working on a project, or a group may contact you directly.
